(a) GDD10, 29 Apr–11 Sep (WorldClim 2.1, 5′, 1970–2000)
white: grid-calibrated T* = 589; red dashed: 900

(b) Gate class of cells with incumbent arable ≥1% of cell area
(SPAM 2010 wheat+maize+barley+potato harvested area)

Projection: ETRS89-LAEA Europe (EPSG:3035), 10 km display grid. Circles: NASA POWER point cells used in the point analysis. Classes are exposure of existing arable area to gates, not convertible area.
